PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1) The manuscript has improved no doubt from original version. 2) Is it Kalantari, Kh. (2006) the reference for "Croanbach's Alpha coefficient"? It should be written in the text (line 123). 3) I suggest that items 3.2, 3.3, and 3.4 should be reduced; On other side, I suggest that the Conclusion should be improved with a better explanation of main results and organized in 2-4 paragraphs. 4) The component "Statements for Measuring the Hidden Variables of the research model" (line 334-393) is it an appendix? 5) Some references are in minuscule letters; it should be revised (eg. lines 78, 88) 6) The mean values of table 3 don't need 2 decimal numbers; round to integer or only 1 decimal. In this table the score domain should be integrated in the table (it is a suggestion) to improve the reading.	1. Thank you for your attention. 2. This was revised in the paper. 3. All three items 3.2, 3.3 and 3.4 were subgroup of part 3. So, each are independent than other item and subgroup general title. Conclusion in this paper was retrieved from main results and effective recommended in 2 paragraphs 4. Yes, it is appendix. That revised in the paper. 5. This was revised in the paper. 6. This was revised in the paper.
