SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	**MS: 2012 AJEA 2811**
Title of the Manuscript:	**Interaction of fluorescent pseudomonads with *Pythium ultimum* and *Rhizoctonia solani* in cucumber roots**

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	**Authors' response to final evaluator's comments**
I recommend to accept the manuscript, but a few new mistakes should be corrected. **Authors changed the manuscript according to all of my suggestions. One of my suggestions was adding the arrows on figure 5 which precisely will indicate pseudomonads cells on electronographs. Authors did it; however I do not understand why arrow is placed on figure 5b. On figure 5b we can see cucumber roots inoculated only with P. ultimum; not with pseudomonads. It should be corrected or explained.** **Minor points:** **1. Authors' affiliation should be precisely marked.** **2. The last paragraph of Introduction. Spelling should be corrected. Species names should be given in italics. Instead of Pythium and Rhizoctonia the abbreviations (P. and R.) should be introduced. 'Solani' with lowercase leter.** **3. Figure 3. Denotation of part 'a' and 'b' is missing.**	**We would like to than the evaluator for his helpful comments. All the suggestions were made accordingly** **The arrow was removed from fig 5b, it was placed by mistake** **1. Done** **2. Done** **3. Denotations were added**
