

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	2013_AJEA_5933
Title of the Manuscript:	PHYSIOLOGICAL INFLUENCES OF <i>Aspilia africana</i> ON LITTER TRAITS OF BREEDING RABBIT DOES

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The comprehension of the paper improved a lot. I would suggest shortening the introduction as shown in the attachment file. Only one critical part exists: the feeds used in different treatments are still a bit confusing. Did the does receive concentrate during the trial? If so, please, indicate. In attachment file you can find my detailed comments and further suggestions. In conclusion I strongly recommend clarifying the material and methods.	I have shortened the introduction accordingly in page 1 (lines 46-96). Although the comments from the two reviewers are contradictory at some points but I have tried my best to balance my respect for the views of the two reviewers. The Materials and Method are clarified, the does received concentrate during the trial as corrected in page 2 (lines 109-110).
