- This form has total 9 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The subject of this work seems very original and interesting to me. It deals with the perception of small farmers in relationship to their decisions about application of soil fertility management. The work is well written and data are deeply discussed. I only found minor corrections. Perhaps the authors might include more references.	Thank you for your encouraging comments. I have really tried to include related references as much as possible though there can be other references for which we haven't got access.
<u>Minor</u> REVISION comments	line 96: delete "sufficient" Line 99: change for "...Sampling procedure and data analysis..." line 101: change for "two districts were selected" lines 222=223: these options had already been defined before in lines 156 and 158	All minor revision comments are well taken and revision is made accordingly.
<u>Optional/General</u> comments
