Subject: Re: Request for final decision for manuscript number 2012 AJEA 2599

The final decision for manuscript number 2012 AJEA 2599 entitled "Growth and Foliar Yield Responses of Waterleaf (*Talinumtriangulare*Jacq) to Complementary Application of Organic and Inorganic Fertilizers in a Ultisol" by NdaeyoNU, Ikeh AO, Nkeme KK, Akpan EA, andUdoh EI.

I agree with reviewers that the manuscript contains valuable data. The last (third) version of the manuscript is much improved in comparing the two previous ones. Authors have introduced into the text many changes, according to almost all reviewers' suggestions and requirements. However, the manuscript is editorially poor. It is prepared not according to AJEA requirements. Authors must carefully read the "Author's Instruction" (available at <http://www.sciencedomain.org/page.php?id=general-guideline-for-authors>) and change the manuscript according to this instruction. First of all, spaces must be carefully corrected in entire text. Secondly, numbers must be introduced instead of authors' names of referred papers and the references (in REFERENCES, page 8-12) must be numbered in the order that they appear in the text; not alphabetically.

My final decision is: Accept after corrections according to AJEA requirements.
