Evaluation from Editor LZ Chen for manuscript number 2013 AJEA 4380

This manuscript has focused the problem that is tightly related agricultural production in Africa. And they have chosen correct materials and methods to do experiments and clearly written and summarized the results. For the review process, the manuscript has been reviewed with higher evaluations by three reviewers and, the authors have given satisfied responses to the reviewers. From the above, I think the manuscript number 2013 AJEA 4380 should be accepted for publication in AJEA, in the revised manuscript.
