Subject: RE: Request for final decision for manuscript number. 2012 AJEA 2451

I have gone through the manuscript revision and I must commend the authors for taking time to respond to all the queries and suggestions raised by the reviewers. Having gone through the original and revised manuscripts and actions taken to address some of the gaps, I am confident the paper **“Relationships between farmers’ environmental behaviors and water resource management: The case of Khuzestan Province, Iran”** is now acceptable for publication with the [American Journal of Experimental Agriculture](#) following addressing of the minor issues listed below:

1. I do not think the title really portrays the contents of the manuscript, particularly the reference to “farmers’ environmental behaviors”, a revised title e.g. **“Relationships between farmers’ behaviors towards environmental resources and water resource management: The case of Khuzestan Province, Iran.”**
2. The typographical error pertaining to the month of January in the abstract needs to be corrected.

I therefore recommend the manuscript for publication.
