Subject: Re: Request for final decision for manuscript number 2013 AJEA 4055

With reference to our previous correspondence, I send as an attachment the checked paper entitled "Effect of spatial arrangement on the performance of cowpea /maize intercrop in derived savannah of Nigeria" (2013 AJEA 4055).

I am very sorry, but this manuscript cannot be published in AJEA in current form.

Despite of the review process, there are a lot of technical mistakes in the manuscript. Some data are presented twice or even thrice In some places description of the results is not in accordance with the data presented in tables. Experimental design is described in a not sufficiently understandable manner. References have been

prepared carelessly and not in accordance with the AJEA guide for authors (the reference list does not include six of the works cited in the text). Detailed remarks are pointed in the attached manuscript.

However, the manuscript shows interesting and important results. In my opinion, it is justified to consider its re-evaluation after the improvement of current weaknesses.

Editor's Details:

Edward Wilczewski,

Faculty of Agriculture, University of Technology and Life Sciences in Bydgoszcz, Poland
