Subject: Re: Request for final decision for manuscript number 2013 AJEA 4361

With reference to our previous correspondence, I send as an attachment the checked paper entitled "STUDY ON THE EFFECTS OF FRESH SHOOT BIOMASS OF TITHONIA DIVERSIFOLIA ON THE GERMINATION, GROWTH AND YIELD OF COWPEA (VIGNA UNGUICULATA L.)" (2013 AJEA 4361).

Before the final decision, I would like to see the authors' answers to all of the reviewer comments.

Reviewer JG has written: "..... the results section is somewhat confusing. I suggest **not to repeat the information included in the tables in the text**....." I completely agree with his opinion (see remarks in the result section).

Moreover, despite of the review process, there are some technical mistakes in the manuscript. In some places description of the results is not in accordance to the data presented in tables. Detailed remarks are pointed in the attached manuscript.

Editor's Details:

Edward Wilczewski,

Faculty of Agriculture, University of Technology and Life Sciences in Bydgoszcz, Poland
