Subject: Re: Request for final decision for manuscript number 2012 AJEA 2483

Please find my final decision on the MS (2012 AJEA 2483) as an attachment.

**Attached Part:**

In this paper titled “Effect of Nitrogen Supply and Genotypic Variation for Nitrogen Use Efficiency in Maize” the author(s) have investigated the genetic variation for different traits related to nitrogen use efficiency (NUE) using ten maize genotypes exhibiting contrasted responses to nitrogen nutrition. I found the paper is of general interest even though there were some serious issues needed to be addressed in earlier version this MS. The authors have addressed almost all the comments pointed out by each of the reviewers’ and made necessary amendments in the paper according to the suggestions. However, the authors could have split the Abstract section into different sub-sections such as Aim, Design, Methodology, Results, and Conclusion etc to follow the journal style properly! In my opinion, the paper can be accepted for publication without any further changes.

**Editor’s Details:**

Dr. Md. Rashedul Islam,

Department of Biological Sciences, Inha University, Republic of Korea
