Subject: RE: Request for final decision for manuscript number 2013_AJEA_5222

I have read and refereed the comments from the reviewers and the Editors. I have known that, 1) the authors have written the manuscript with the interesting data; 2) the reviewers also have given highly evaluations and valuable comments; 3) the authors also have revised it according to the comments from the reviewers; 4) However, the final decisions from the Editors were different, one is rejected, and one is only title changing. In my opinion, the problem is that whether the reports of 2003 and 2004 published by some same authors are the official publication as a scientific article or not. If they are, it should be not accepted to the Journal. I think managing editors need to investigate it clear by through some methods.

Final decision on 2013_AJEA_5222 by Chen

In final, I decide that the manuscript of 2013_AJEA_5222 should be published in present status, as the data appeared in the manuscript is not published in any official journal anywhere and anytime, based on searching results.
