Subject: Re: Request for final decision for manuscript number 2012 AJEA 1714

Please find attached my decision regarding the manuscript number 2012 AJEA 1714.

Attached Part:

Final decision for manuscript number 2012 AJEA 1714 entitled "Genotype by Environment (G x E) Modeling of the Variable Initiation of Parthenocarpy in *Musa*: Elucidation of the Environmental Components of Variable Expressivity of Parthenocarpy in a Facultative apomictic *Musa acuminata* Subspecies *Microcarpa* Model System"

I agree with reviewers that the manuscript contains valuable data. The last (third) version of the manuscript is much improved in comparing the two previous ones. Authors have introduced into the text many changes, according to almost all reviewers' suggestions and requirements. However, the manuscript is still editorially poor. I have in mind for example the diverse formats of citations in the entire text, wrong numbering of subsections in Materials and Methods and in Results and Discussion. The reference list needs editorial correction as well.

My final decision is: Accept.

Editor's Details:

Dr. Sławomir Borek
