

SDI Review Form 1.6

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	2013_AJEA_3649
Title of the Manuscript:	AN INVESTIGATION OF THE CONTENT OF MANGANESE IN THE FRUIT OF MARROWS IN RESPECT OF THE KIND OF FERTILIZER AND THE TYPE OF FERTILIZATION

General guideline for Peer Review process is available in this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

- This form has total 7 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The paper not contain enough scientific information and is not clearly and concisely written. There is no information on the NPK dose used in fertilizers ($N_{16}P_{16}K_{16}$?), lack of statistical calculations, units used to express the yield are inadequate (kg/dka?), there is no data on the content of micronutrients in fertilizers used. Spelling unit is not compatible with the existing system of SI. The pre-work should be more information about the role of fertilizer in the accumulation of manganese in plant tissues. There is no discussion of results, inference is based solely on the results obtained. Working assumption raises doubt.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	Poor-should not be published in AJEA	

Note: Anonymous Reviewer
