PART 2: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The description of this paper is cumbersome and unfocused, but there are still many doubts, such as the data in table 1 is the data of which variety or the average of all the varieties? The figures are improper, such as Fig. 9.10.15.16.19.20.21.22 should not use line chart. The significant difference was not marked in all the figures. There are some inconsistencies in this paper.	
<u>Minor</u> REVISION comments	Such as space between two words, the title of figures and so on.	
<u>Optional/General</u> comments	I suggest the author should rewrite this paper seriously, emphasis the highlights of the research, and resubmit it again.
