

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	2013 AJEA 4373
Title of the Manuscript:	Production Constraints and Measures to Enhance the Competitiveness of the Tomato Industry in Wenchi Municipal District of Ghana

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
It is critical that the authors re-arrange tables and figures as presented in the results and discussion. All tables and figures should come below the explanation not the other way. Secondly, if the first author is the corresponding author as indicated with asterisk then he must display his email address as I have indicated in the green background. Finally, there are few comments I asked the authors to address but I noticed that some are still not done. A typical example is provision of references to some of the statements made. I strongly suggest this paper be accepted pending another revision based on the comments made.
