SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	Minor REVISION	
Optional/General comments	In the abstract, line 8 to 9, the statement: "Hitherto, there is no effective control measure to manage this Disease"; which disease ? Instead of : <i>Aloe Vera</i>, write : <i>Aloe vera</i>. What were the results and the important results fund in this study? In the introduction, the problem statement is nt clear. In experimental materials, line 46, nowadays, we have the complex (<i>Dioscorea cayenensis</i>-<i>Dioscorea rotundata</i>),we are no more talking about white yam (<i>Dioscorea rotundata</i>) (L). The authors have to correct that. In the results Line 116, Instead of: Population reduction was however, greatest with neem extract, write: Population reduction was however, the greatest with neem extract, In the discussion, the following sentence: "Also confirmed was the antimicrobial activity of garlic against a broad spectrum of fungal and bacterial organisms as reported by other authors (12, 13, 14, d as this15 and16) in line 190 to 191 was n French; and as this, this sentence does not mean anything. The authors should find a specialist or genuine translation. Aceptd with Minor Revision:	The corrections have been effected. Corrections effected. Although complexes exist, but still white yam (<i>Dioscorea rotundata</i>) (L). while yellow yam (<i>Dioscorea cayenensis</i>) Correction effected Please, I seem not understand the point of concern but in any case any corrections or translations done by the reviewer(s) is acceptable by me on point.
