SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	This work has useful value for biological control the plant disease , but some Figures should be added in the manuscript Every crops should be used more than varieties, including resistant and susceptible matewrials.	There was no clear cut resistance among the crops varieties in the preliminary screening due to some suggested factors (age of the crops at harvest, nutritious status of the soil etc). To ascertain resistance, require growing the crops in a regulated environment which is beyond the scope of this work. So no resistance variety of the various crops to the disease was established as the time of this work.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
