

SDI Review Form 1.6

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	2013_AJEA_7868
Title of the Manuscript:	Potassium Nutrition and Translocation in Cassava (<i>Manihot esculenta</i> Crantz) intercropped with Soybean
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	Introduction: Restrict to N/K needs of Cassava+Soybean intercropping system only. Results:No Soybean, Cassava equivalent yields and Economics were given. Arrange table in order of Cassava Var x Soybean early medium and late varieties for better understanding crosscheck the abrupt yield of 40.2 t No K45. What is the trend for K demand in the intercropping system. Was TMS is sig out performed(28.46t/ha) over NR series(26.38t ha) in intercropping. Similarly Soybean Early medium late varieties grouping. Article should be typical of intercropping system.	Introduction: This study was conducted to investigate the effect of potassium nutrition and translocation in cassava intercropped with soybean. Results: The study was not an economic work so equivalent yields and economics was not done. The tables have been rearranged to reflect the corrections
<u>Minor</u> REVISION comments	English	English has been upgraded.
<u>Optional/General</u> comments	Additional data is required which was not presented
