SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Line 9 : Early July instead of Early June Line 70: Late May instead of early May Line 71: Early July instead of early June Line 72: Fructose instead of glucose Line 73: 0.94 instead of 1.43 Line 74: 0.70 instead of 1.13 Line 96: sucrose instead of glucose Line 96: add glucose in front of total sugars Line 96: Raffinose instead of sucrose Line 125: liquid instead of lipid	DONE
<u>Minor</u> REVISION comments	Line 7 : a comma between fructose and stachyose Line 22: crop instead of crops Line 48: July 9 and July 17 instead of July 17 and July 9 Line 93: delete study	DONE
<u>Optional/General</u> comments	Line 52: give the quantity of N,P, and K separately. instead of 112 Kg of N,P, and K 1. Lot of careless mistakes are noticed in the article. 2. Four references were mentioned in results and discussion part. Only two were related to the present study. I think this is not sufficient for a full research article. 3. The researches in oil seed crop mostly concentrated on quantity and quality of oil (minerals, amino acid, fatty acid and anti-nutritional factors) and seed yield. But this work concentrates on sugar content in sesame seed. In some countries, the sesame seed is used for culinary purpose apart from oil extraction. In this contest, studying the sugar content in sesame seed is considered interesting.	DONE
