

SDI Review Form 1.6

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	2014_AJEA_9319
Title of the Manuscript:	DYNAMIC CROP WATER PRODUCTION MODEL OF PLANTAIN YIELD RESPONSE TO WATER
Type of the Article	Agricultural science

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The purpose of the work was design a model that would estimate plantain bunch yield response to available soil moisture. The work was well conducted and all of field parameters were well attended. However, model adjustments should be done to the results to be able to predict better the dynamics of the production function crop-water with different moisture stress levels.	Noted
<u>Minor</u> REVISION comments	Some parameters were not presented as in eq 6 and 17	Noted
<u>Optional/General</u> comments
