

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	2014_AJEA_10400
Title of the Manuscript:	EFFECT OF DIFFERENT RATES OF PHOSPHORUS FERTILIZER ON SOYBEAN {GLYCINE MAX (L.) MERRIL} INOCULATED WITH RHIZOBIUM

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The revised paper is not yet mature for publication in this journal (See comments inserted in the paper). I have two major critics: 1. The narrative quality of all sections 2. Statistical analyses of data If data are sent to me, I could assist with correct statistical analyses. Note that I visited the current issue of AJEA and I send it to the authors.	The comments inserted in the manuscript have been largely incorporated in the main text. The materials and methods section of the paper have been improved that makes it easy for one to follow or repeat the work. The data has been analysed statistically with LSD to test for significant differences and CV to indicate the reliability of the research. Lines in histogram also represent SE. I have gone through the current issue of AJEA sent to me and I am happy to have used it to effect some few changes in my text. With respect to the reanalyses of the data, I think we have gone too far to reanalysed the data so I suggest since there are no technical errors (Issue of using Duncan to separate means is an option) we leave it as it is now.
