

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	2014_AJEA_10502
Title of the Manuscript:	Performance, haematology and serum biochemical indices of broiler chickens fed toasted sesame seed (Sesamum indicum, Linn) meal based-diets

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
None of the most important proposals in the first evaluation were made by the authors The performance data were not corrected, the authors didn't show the data of the week weights feed intake and feed conversion obtained at 7, 14, 21, 28, 35, 42, 49 and 56 days of age The material and methods were not corrected according to first revision The identification of tables should be the amount of the sesame meal, not T1, T2, T3, T4, and T5	Sincerely, we do not understand what the reviewer meant here. This statement is not explicit True, the overall data presented on these indices were summarily given on overall basis for the entire 8weeks period. We opined this is the best manner the data could be presented in the situation of the research We are not aware of anything specified in the materials hitherto remained untouched in the material and methods. The revision was earlier painstakingly carried out All Tables had corresponding footnotes that explained the meaning of T1, T2, T3, T4, and T5
