

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	2014_AJEA_10862
Title of the Manuscript:	Composition and dynamics of some nutrient levels in Jabi dam, Lower Usuma dam and Gwagwalada river in Federal Capital Territory, Abuja, Nigeria.

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Some of the queries raised in my comment were not corrected. Eg. The use of the term nutrient for TDS was still in place. No further addition or description of human activities was included for the stations. The map was not mentioned or referred to in the text as Fig. 1. The map is not clear(only Usuma and Gwagwalada that is visible on the map) and I believe that it was lifted from another document because it has a page 51 and the manuscript page number is 4. Other comments have been made directly in the manuscript using Microsoft Review.	The title has been modified to read' Composition and dynamics of some nutrient and physic-chemical parameter in lower course of Gwagwalada River in Federal Capital Territory, Abuja, Nigeria.' This is to accommodate the TDS to remain as it is in the paper. I retain the word nutrient because of the I have included Physico-chemical in the title. WHO is the national standard. The green area is the river which is clear.
