

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	2014_AJEA_11076
Title of the Manuscript:	Effects of Sodium Azide (NaN ₃) on Seeds germination, Plantlets Growth and <i>In vitro</i> Antimalarial Activities of <i>Phyllanthus odontadenius</i> Müll Arg.

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I have appreciated the behaviour of the authors; they proved that they are truly scientists. However, I would like in the abstract (the part “Aims”) that, instead of: “This study aims at investigating the production of secondary metabolites of <i>P. odontadenius</i> against malaria using some concentrations of sodium azide (NaN₃) and to choose those with high <i>in vitro</i> antimalarial activities”, the authors write: “This study aims to investigative the production of secondary metabolites of <i>P. odontadenius</i> against malaria using some concentrations of sodium azide (NaN₃) and to choose those with high <i>in vitro</i> antimalarial activities.” In fact, it is just a suggestion. In the references, I did not find the reference [53].	Thank you very much for your final evaluation and for your congratulation. Thank you for that. The section could be change as your idea. It's good! “This study aims to investigate the production of secondary metabolites of <i>P. odontadenius</i> against malaria using some concentrations of sodium azide (NaN₃) and to choose those with high <i>in vitro</i> antimalarial activities.” Thank you for this remark, yes the reference [53] is not in the manuscript. It was deleted.
