FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Most of the suggestions and corrections taken into consideration, but a few were not given below: The year of the study was written in abstract 2012, should be corrected as 2011 according to the author. Units of characters should be added to the tables, graphs and in the text. e.g. No of insect should be changed as No of pest (individuals/10 panicles), because it has not only insect, but also includes spiders, predators, pollinators. Also, population of insect should be given as e.g. line 211, 19.11 individuals/10 panicles...etc. Statistical units missing should be added, e.g. $\pm$SE Line 320, Title should be corrected as only conclusion. The punctuation signals in reference list are not compatible with instruction, should be corrected again according to the instruction.
