

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	2013_AJEA_4679
Title of the Manuscript:	Bio economy Adoption Process of Agro-biotechnology Among Researchers in Nigerian Universities/Research Institutes: The Logistics Regression Approach

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Line 115-118 highlight the motivation of this research, but still far from the problems in introduction part. Line 174-179 attempted to respond to methodology comment. This paper is not about farmer's adoption while the author said this paper is to determine farmer's choice. This statement contradicts with line 73-75. It is unacceptable to make this big mistake. Line 193-199 still did not clarify variables, how they are measured, and how the information is obtained. This is probably the most important part of the paper, and it is still unclear.	In addition too, breakthrough in biotechnology research should be given effective extension delivery by the researchers to the end users (farmers) and understanding the relevance of biotechnology in small farms development. The paper is about adoption process of biotechnology among researchers in Nigerian Universities and research institutes. This statement has been incorporated in the relevant section of the paper. Classifications of the variables were done and how they were measured explained. How information sought for were through questionnaire which was distributed to identified researchers and information retrieved from the questionnaire were analysed accordingly to the objectives of the study.
