

Find below our response to reviewer comments in red colour,

First to all, we have changed the title and the author list as:

Chemical Characteristics of Tropical Cambisol as Influenced by Sugarcane (*Sacharum officinarum* L.) Foam and Inorganic Fertilizer

Bouadou oi Bouadou Félix¹, Brahim Koné¹, Yao Kouakou¹, Yao-Kouamé Albert¹, Sylvester O. Oikeh²

¹Université Félix HOUPHET-BOIGNY d'Abidjan-Cocody, UFR des Sciences de la Terre et des Ressources Minières (STRM), Département des Sciences du Sol, 22 BP 582 Abidjan 22, Côte d'Ivoire ;

²African Agricultural Technology Foundation (AATF), Nairobi, PO Box 30709-00100, Kenya

We have included the response to reviewer as below:

I have gone through the manuscript and reviewers recommendations. My suggestions are as follows:

1. The author(s) need to seek assistance from someone well versed with the English language in order to improve the readability of their manuscript. It has too many grammatical mistakes and unnecessary typographical errors, in my opinion.

The manuscript was entirely rewritten for language editing. Therefore, we have highlighted only significant changes that are related to the results.

2. The tables showing levels of significance (enumerated by letters a to e) need revisiting. The said letter should come after the sd values.

Changes are highlighted in yellow colour.

3. Some of the figures indicated by different letters do not really significantly different, attention should be made to that e.g. C-org in Table 2 for rates 6 and 12?

Changes are done and highlighted in yellow.

If the authors should pay attention to the issues raised, the paper may then be reconsidered for publication.
