Subject: Re: Request for final decision for manuscript number 2013_AJEA_4412

Please find my decision regarding manuscript no 2013 AJEA 4412. The manuscript still needs correction. I attached to this mail the manuscript with detailed information regarding additional corrections. Before I will make the final decision I must re-evaluate the manuscript.

Editor's Details:

Sławomir Borek

Department of Plant Physiology, Adam Mickiewicz University, ul. Umultowska 89 ,
61-614 Poznań , Poland

Note: Modification was done in this document ONLY to hide the email id.

Attached Part:

The final decision for manuscript number 2012 AJEA 4412 entitled "Effects of water extracts of neem (*Azadirachta indica* L.) leaf, wood ash and their mixture on soil chemical composition and growth and yield of plantain (*Musa sapientum* L.)" by Emmanuel Ibukunoluwa Moyin-Jesu.

After evaluation of all materials related to the manuscript I agree with reviewers that the manuscript contains valuable data and I might be willing to support the positive recommendation from them. However, before doing that I need to ask Author for some additional corrections.

Author has introduced into the text many changes according to reviewers' suggestions and requirements but the manuscript is still editorially poor. The text is written in messy way. It is still prepared not according to AJEA requirements. Author must carefully read the "Author's Instruction" (available at <http://www.sciencedomain.org/page.php?id=general-guideline-for-authors>) and change the manuscript according to this instruction. I strongly suggest using 'MS word paper template' which is available at above mentioned web page.

First of all, manuscript must be rearranged according to AJEA requirements. Almost all units in entire text need correction. I marked it in the manuscript. A special attention should be paid on reference list. It must be corrected.

I marked in the manuscript many fragments which must be corrected or explained. It is possible that I overlooked some mistakes, so Author must accurately correct all mistakes according to my suggestion. To sum up, I need re-evaluate the manuscript before I will make the final decision.
