**PART 1: Review Comments**

|                                            | <b>Reviewer's comment</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | <b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i> |
|--------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b><u>Compulsory</u></b> REVISION comments | <ul style="list-style-type: none"> <li>- Row 8 and 58: There were 300 chicks instead of 180 in the experiment?</li> <li>- Row 106-108: The FCR was higher in T2 compared to T1 (control), so T2 was worse compared to T1. Therefore, this statement is erroneous.</li> <li>- Conclusion: Row 285: 25% instead of 22%.<br/>Take away the word "performance"</li> </ul>                                                                                                                                                                                                         |                                                                                                                                                                                             |
| <b><u>Minor</u></b> REVISION comments      | <ul style="list-style-type: none"> <li>- Insert the abbreviated form of alanine amino transferase, alkaline phosphatase, high density lipoprotein and aspartate amino tranferase in the Abstract</li> <li>- Row 49: "creatinine" (lower case)</li> <li>- The authors should mention the Table 1 in the text of "Materials and Methods"</li> <li>- What is "DM" in the title of Table 1? It is suggested that this letters must be in a unabbreviated way.</li> <li>- The composition of Premix must be on Table 1.</li> <li>- "Full fat soybean meal" (lower case)</li> </ul> |                                                                                                                                                                                             |
