

SDI Review Form 1.6

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	2013_AJEA_6265
Title of the Manuscript:	EFFECTS OF LOW PROTEIN DIETS SUPPLEMENTED WITH HIGH AMINO ACIDS (METHIONINE AND LYSINE) ON PERFORMANCE OF BROILERS.
Type of the Article	Research Paper

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	- Very low level of novelty, - To low number of replicates per treatment (only three, in such kind of poultry experiment it should be at least 5-6 for proper statistical analysis), - I don't understand why in this study only one type of control diet, with very high level of crude protein was used. In standard broilers feeding program at least two types of diets are used: starter (to d 14-21) and grower-finisher (to d 42). - English grammar and spelling are rather poor quality.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
