

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	2013_AJEA_4679
Title of the Manuscript:	Bio economy Adoption Process of Agro-biotechnology Among Researchers in Nigerian Universities/Research Institutes: The Logistics Regression Approach

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
My earlier comments: Line 193-199 still did not clarify variables, how they are measured, and how the information is obtained. This is probably the most important part of the paper, and it is still unclear. The authors explain variables in table 1, but the descriptions are unclear. For example, the dependent variable: process done on Adoption of biotechnology innovation (1= Yes, 0=No). The authors should specify what adoption means, which processes are included in this type of adoption, etc. Furthermore, for the independent variables i.e. intensity of acceptance, intensity of cooperation, etc., the authors did not explain how the intensity is measured or what questions were asked to generate these variables.
