SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	The paper is robust in form and text. Is clear and not show problems. Only need the more adequate Fig. 1. Use different colour to show the clusters. Need a legend more clear. The manual delimitation from cluster is inadequate. Included a table with the means from the 42 genotypes. Is useful for other readers	This figure is created by computer software. So it is not possible now. I have corrected it according to reviewer guidelines.
<u>Optional/General</u> comments
