

SDI Review Form 1.6

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	2013_AJEA_8353
Title of the Manuscript:	THE EFFECT OF HAPA ON GROWTH, SURVIVAL AND CONDITION FACTOR OF <i>CLARIAS GARIEPINUS</i> FRY IN LARGE VOLUME OF WATER.
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	-In P 1, -L 13 : add were - L14 delete " water quality parameter" - L 18 not clear sentence " in the study although they are not significantly different (P > 0.05) from each other." -Please indicate in the abstract the water volume tested - Please indicate the number of fry in each tested group. -Please add the names of scientific equipments used for water quality determinations. - this formula " Total body length = final length – initial length at the start of the experiment. [4]." Not indicative it should be Increase in total body length in Cm= final length – initial length. _ please add the units for the measurements indicated in the formulae _The abbreviations of the experimental groups should be metalized at first mention and show the abbreviation between brackets. The title of figure 3 should change to " effect of on increase of total body length. One big comment is that in table 1 there is no differences of Dissolved oxygen in aerated and no-aerated groups, How? And Why? This is in spite of	Done Sentence reconstructed Volume indicated Number of fry included Done Corrected Done Infected in manuscript Correction was infected Water quality parameters of source of water for treatments was reported.

SDI Review Form 1.6

	the author said that " In a small volume of water, such as in small tanks 88 there is need of aeration as the dissolved oxygen can be depleted by the fry". - The author should indicate water volume at all groups - The author should describe in detail HABA system.	Inserted in manuscript Done
<u>Minor</u> REVISION comments	Italics the Latin words	Done
<u>Optional/General</u> comments	The article should be rewritten as indicated in pdf and word docs.	Article were rewritten in word document.
