

This letter is in response to changes that were made during the proof reading stages of the above accepted manuscript.

Below are the changes that were made during proof reading stages of the manuscript.

1. The name of the second author is Andrew J. Daymond but was written Andrew Daymond in the galley proof version. This was corrected.

2. CODAPEC was rather spelt CODEPEC in the galley proof. This was corrected by the authors.

2. Bibiani Anhwiaso Bekwai District was initially written BABD so changes were made to areas where Bibiani Anhwiaso Bekwai District to BABD to ensure consistency. Check galley proof and the corrected version for verification.

4. Changes to Tables

The only changes that were made were in Table 4. The total of minimum and maximum values was corrected. The initial minimum value was **230** instead of 220 and that of the maximum was also **24140.00** instead of **24,090.00**.

5. The name of tables you inserted during typesetting did not correspond with the correct tables that were presented in the work. Kindly cross check the corrected proof read version and the galley proof you sent me and you will realise what I am saying.

We hope we have been able to explain why the minor changes were made to the proof.
