Subject: RE: Request for editorial decision for manuscript number 2014_AJEA_13602

I am not going to go through this manuscript until the authors explicitly provide page and numbers in the author response column for the reviewer's comments and highlighting responses in the text where they carried out the revision. I don't check did the authors really carried out the revision and responded satisfactorily to the reviewers comments. Just stating thanks in the response column and saying it has been carried out as requested by the reviewers is not sufficient. I don't check line by line of the responses for reviewers comments, this is why I am asking for line and page numbers of the responses.

Reviewers 3 and 4 had serious comments but I don't see any meaningful response or no responses at all. I am not going to recommend the paper without the responses to the reviewers 3 and 4 and the author response column filled out strictly as suggested by me.
