

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	2015_AJEA_18473
Title of the Manuscript:	Distribution of cassava mosaic geminiviruses and their associated DNA satellites in Kenya.
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Most of the review comments have been adhered to. However, there seems to be some additions which in my opinion are unnecessary. I have suggested that these be deleted. Furthermore, the description of the PCR protocol under 'Nucleic acid extraction and detection of Cassava mosaic geminivirus' needs further improvement. The author(s) need to be precise with the composition of the PCR mix. I have made some changes on the manuscript which may be incorporated. Author should visit the Journal's author guidelines for abstract format. I also suggest proof-reading by all co-authors.	The protocol was improved with the PCR master mix explained in detail and the cycling regimes The Abstract was modified as per the journal guidelines, reduced to 300 words The manuscript was also read by the other authors before re submitting
