SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Very interesting and benefit for farmers. We understand that intercropping 0 week is a good alternative for both productions, for the farmers. Where are Statistical data and results? Please, Can they introduce meteorological data ? Temperature and rainfall data? And dates of sowing? Sun and Moon influence? Probably moon influenced. Farmers knowledge?	The results and statistics are presented in Tables 3 and 6 Rainfall data has been included as Table 2 The experiments were planted in May of both years when rainfall became stable. Sowing date may not have influence. Sesame is a new crop in the area and results of this experiment will increase farmers knowledge
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
