FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Still you didn't made the correct statistical analysis The letters presented (a, b and c) are very confused, does the significance degree is progressed from a then b then c? you just putted the letters without scientific base Check your analysis well (table 3). You didn't mentioned the L. S. D. , it must be written under each table for each to enable the reader to check your analysis. Sorry , if you will not repeat your statistical analysis to answer which treatment is the best then the others on a constant value or base your paper can't be published in a good journal
