The manuscript „Effect of Supplementation of Soybean Meal with <i>Leucaena leucocephala</i> Leaf Meal on Performance, Haematology, Carcass Measures and Organ Weight in Broiler Chickens” is generally well-structured. It was noted that the paper has been revised by authors and can be accepted for publishing after minor revision. In first phase (starter) were 150 chickens (10 birds per replicate) and in finisher phase 8 birds per replicate (total 120 chickens). How many birds were slaughtered at 28 days, but at 56 days?
