

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	2015_AJEA_17524
Title of the Manuscript:	SELECTION CRITERIA FOR YIELD AND YIELD RELATED TRAITS IN SESAME (Sesamum indicum L.)
Type of the Article	Review Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors have revised the article without covering all the points suggested by the reviewer. The detail outline for revision has been mentioned in the text (original article). The authors updated the review of literature upto 2014-15, but did not identify any research gap or new research opportunities. They also did not merge the similar findings for precision of the article and not discussed those reports in the light of future prospect. Again year wise abstracts have been documented. Most important thing: pls. club together the similar findings of previous reports. Do not write one paragraph abstract for one report. Pls. include a discussion part of those findings. Then draw a valid conclusion. Therefore, it is suggested to revise the manuscript again.
