**PART 1: Review Comments**

|                                            | <b>Reviewer's comment</b>                                                                                                                                                                                                                                                                                                   | <b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b><u>Compulsory</u></b> REVISION comments |                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                      |
| <b><u>Minor</u></b> REVISION comments      | Minor changes as suggested can be done by the author. Regarding discussion part only work done by Wanjala et al. (2013) has been mentioned but not discussed how your finding are at par with his findings and also add more to discussion part as genetic diversity on Napier grass has also been studied by other workers |                                                                                                                                                                                      |
| <b><u>Optional/General</u></b> comments    | The information on the genetic diversity of Napier grass can be used in breeding programs for the selection of better clones.                                                                                                                                                                                               |                                                                                                                                                                                      |
