PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Authors have shown some improvement of the proposed document. However, they may consider detailed review in the manuscript presentation.</p> <ol style="list-style-type: none"> 1) Please be consistent in legends and abbreviations. Ex. ECHO vs. ECHO-Doppler 2) Provide further details in figures. Reader may get all necessary descriptions without looking back in the manuscript. 3) Please take care of additional spaces in reference numbers. 4) Avoid the use of double parentheses (i.e. (())). Use brackets or reformulate the sentence, when using units use [mmHg] for example. 5) Please acknowledge that the state-of-the-art is 3D FSI (add references) and not 2D FSI and justify it with other works in 2D. 6) Use equation editor to improve equation presentation (i.e. bad quality). 7) Add tick marks to plot units. Take care of font size, to small is hard to read, to big is useless. 8) Consider improving base image resolution. 9) Please, proof read careful the entire document! <p>No further comments are needed.</p>
