

SDI FINAL EVALUATION FORM 1.1

PART A:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	MS: 2012/BJAST/1696
Title of the Manuscript:	Adapting Nigeria Cities to Climate Change using Design Options. A Review.

PART B:

	FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
For comments of Reviewer 1 and author's feed back	The author has corrected the paper to a great extent and the quality of paper has been improved extensively. One part which needs a correction is quoting sources in the section 3 "some facts on Climate change". As this is completely factual, there is a need to quote its source. Second thing which needs consideration is the "Conclusion". A concluding line may incorporate further scope of research in this area. Except for the "tenses" of sentences at few places, the overall paper is streamlined and good. The author has taken comments in a positive spirit and incorporated the required information as needed, which is remarkable.
