

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	MS: 2012/BJAST/1819
Title of the Manuscript:	EFFECTS OF INJECTED N-METHYL-N-NITROSOUREA (MNU) IN ALBINO MICE ON THE HISTOLOGY AND HAEMATOLOGY OF SELECTED ORGANS OF THE CIRCULATORY, LYMPHOID AND DIGESTIVE SYSTEMS

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors have answered to the reviewer's comments and revised the manuscript. Still, too many figures appear in the Text. The author should further select important and good quality figures for publication. Check References again because first name and last name is mixed up. In lines 37-52, check the word rats and mice. Finally, I will leave a decision to Editor-in-Chief whether the manuscript is worth publishing in Br J Appl Sci Technol.	The figures have been reduced further. We have reduced photomicrographs to two per organ (one for control and one for the induced mice). Efforts were made to select good quality figures for publication, as well as to improve on resolution (Fig. 3). References have been checked and corrected accordingly. Lines 37-52 have been carefully checked. Amendments have been made in line 50. Usage of the words "rats" and "mice" interchangeably in the other lines have been confirmed to be correct.
