| <b><u>Optional/General</u></b> comments    | <p>The paper is a very descriptive work about the habits of consumption of a traditional beverage of Nigeria. I am not familiar with the BJAST focus , but the data obtained is the result of a social questionnaire that give some information about the market and potential development of this beverage in the future. I don't found information that could be considered of food science, such as a sensory, microbial processes or chemistry analysis of the characteristics of this beverage. I suggest revising the paper by experts related to questionnaire social research and human consumption habits.</p> |                                                                                                                                                                                             |
