PART 2: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	The paper is a very descriptive work about the habits of consumption of a traditional beverage of Nigeria. I am not familiar with the BJASt focus , but the data obtained is the result of a social questionnaire that give some information about the market and potential development of this beverage in the future. I don't found information that could be considered of food science, such as a sensory, microbial processes or chemistry analysis of the characteristics of this beverage. I suggest revising the paper by experts related to questionnaire social research and human consumption habits.	1. We clearly stated the objectives and defined the methodology to be used in this study.
