- This form has total 7 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	--	
<u>Minor</u> REVISION comments	1. In the Abstract (10th line) TDS unit should be corrected as mg/l. 2. In the table 2 & 3 the unit of EC is not mentioned correctly and TDS unit is also not given. 3. In column 3 of table 2 & 3, average reading is mentioned for CFU alone. Are not the other physical parameters are average values. Should be verified and corrected. 4. In line nos. 214, 219 etc 'peat latrines' is mentioned. It may be Pit Latrine (dry toilet system). It should be verified.	Dear Reviewer, Thank you so much for detecting these mistakes. We have put them in order according to your advice. NB: the values and the unit of TDS have changed for example, 47 – 123 mg/100ml became 470 – 1230 mg/l, this is because of the conversion from 100ml to 1000ml.
<u>Optional/General</u> comments	Good effort. The study carried out should not be stopped by mere paper publication. Awareness may be created to the Public, Students etc., and may alert the regulating authorities.	Thanks, I will definitely do that when I go back home after graduating next month. It is truly my duty to do that as being a Lecturer at the University of Juba.
