

SDI Review Form 1.6

PART 1:

Journal Name:	<u>British Journal of Applied Science & Technology</u>
Manuscript Number:	2013_BJAST_5462
Title of the Manuscript:	Petrophysics of the B-Reservoir in Eyram Field, Onshore Niger Delta
Type of the Article	Research Paper

General guideline for Peer Review process is available in this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

- This form has total 7 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The paper is about a very common practice in oil and gas industry and there is no clear innovation in the paper as a research or special case study paper. The paper explains some of the classic methods and equations that can be found in the books and if the author removes them, there is no other important message in the paper.	According to Wikipedia, a research could be used thus: “ It is used to establish or confirm facts, reaffirm the results of previous work, solve new or existing problems, support theorems, or develop new theories. A research project may also be an expansion on past work in the field. To test the validity of instruments, procedures, or experiments, research may replicate elements of prior projects, or the project as a whole. The primary purposes of basic research (as opposed to applied research) are documentation, discovery, interpretation, or the research and development of methods and systems for the advancement of human knowledge.” I believe our work has done one or two of the above.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	I highly recommend submitting the paper to a conference like EAGE, AAPG or SEG.	If this paper could be recommended by our noble reviewer to conferences like EAGE, AAPG or SEG who will later publish it in their journals. We believed our paper could as well be published in your journal.
