

SDI Review Form 1.6

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	MS: 2012 BJASt 2588
Title of the Manuscript:	Heritability Estimates and correlations Among Flowering and Yield Related Traits in Mungbean Genotypes

General guideline for Peer Review process is available in this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

- This form has total 9 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	No	
<u>Minor</u> REVISION comments	No	
<u>Optional/General</u> comments	The heritability and correlation studies in mungbean for the studied traits have long before done extensively and repeatedly by different researchers. The information is easily available in literature. Such studies are now not considered as basic or applied science in this field. I am not aware about the scope of this journal but such studies contains nothing to publish in scientific journal. These types of studies are being conducted by M.Sc or M. Phill students in those developing countries where science is not national priority but students need it as formality to complete their degrees. Tables 3, 4 and 5 were also missing in the paper file which I received for review from editor.	The suggestion regarding heritability estimates and Tables has been made in the revised manuscript.
