

SDI Review Form 1.6

PART 1:

Journal Name:	<u>British Journal of Applied Science & Technology</u>
Manuscript Number:	2013_BJAST_4486
Title of the Manuscript:	EFFECT OF GRADED LEVELS OF YEAST FED IN WATER ON THE PERFORMANCE OF BROILER CHICKENS
Type of the Article	Research paper

General guideline for Peer Review process is available in this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

- This form has total 7 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. There is no description about how to get the yeast. And also did not show the cell numbers of yeast per litter of water. And the volume of daily drinking water also did not show. All of the information are very import to support the significant performance after treated with yeast. 2. There is no innovation to use yeast as performance enhancing agent in broilier chickens. Authors should distinguish the differences with others' published studies in the part of introduction .	1. Angel yeast (white label) is available as baker's yeast in the market. Yeast was added at 0.5g, 1.0g, 1.5g and 2.0g per litre of drinking water. There was no water restriction. 2. This is not the first work to use yeast as a performance enhancer. It has been used in broiler chicks, but may be in finisher birds, in drinking water and in drinking water and feed simultaneously.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
